

PC VET

Piperazine Citrate USP

(For veterinary use only)

PRESENTATION :

Each 100 gm PC Vet powder contains 100 gm piperazine citrate USP.

INDICATION :

PC Vet is indicated for the treatment of infections produced by nematoda, sensitive to piperazine, namely ascaris, oxyuris, some strongyloides and trichuris. It is safely active against all adult forms as well as against some evolutive stages of worms where it is found to be a drug of first choice.

DOSAGE & ADMINISTRATION :

It can be administered with any dry or liquid food. All kinds of food and liquid should be stoped before 12 hours of starting medication.

Poultry : 10 gm powder in 6-8 litre of water or in 3.5 kg of food and should be used for 2 days. It should be used for a single day after 4-6 weeks by following the same order.

Cattle, Buffalo and Horse : 10-25 gm/100 kg body weight.

Sheep and Goat : 3-5 gm/10 kg body weight.

Dog and Cat : 100-150 mg/1 kg body weight.

CONTRAINDICATION :

The drug is contraindicated for the patients with a history of piperazine hypersensitivity or patients with renal failure.

USE IN PREGNANCY AND LACTATION :

The safety of piperazine for use during pregnancy and lactation has not been determined. Studies in animal demonstrated teratogenesis in rabbits given high doses of piperazine but not in rats.

SIDE EFFECT :

Nausea, vomiting, colic, diarrhoea, transient headache, dizziness, urticaria, fever and viral hepatitis like disorder may occur.

PRECAUTION :

Keep out of reach of children, cool and dry place & away from light. All medications should be dispensed according to the prescription of the registered veterinary physicians and should be administered with dry food or liquid.
